

Speaker 1 - 00:02

It's blank. It looks like this. And everybody has the same one. Referral source Split date of sale what.

Speaker 2 - 00:12

Are the options for split?

Speaker 1 - 00:13

Is it either in house 7:30 if you brought it in personally, or 60:40? We split the house. So if the house gives it to us as a referral, it's 60 40. But sometimes we have wonky splits. So for example, Ben referred his mother to me in California because he's not licensed in California. So I took over her account and so I gave him. I think I gave him 15%. So then the house gets 30, I he gets 15, I think, and I get the rest.

Speaker 2 - 00:42

Got it.

Speaker 1 - 00:43

So I do believe.

Speaker 3 - 00:46

Oops.

Speaker 1 - 00:49

So that's the only wonky thing that we have some of them like that. Like we don't always do that.

Speaker 3 - 00:56

What is her name?

Speaker 2 - 00:58

And everybody knows what the split is, right? It's not like it's a secret.

Speaker 1 - 01:02

It's not a secret, but some people still don't. It's not that they may not unders or they just don't understand it or whatever. Like Ben never asked me for anything. He's like, nana, just take it doesn't matter. But I was like, okay. And then when I was just going to be her agent and not get caught compensated on it, I was like, there's no compensation. He's like, no worries, not a big deal. But the moment I did get it, I was like, hey, let's give something to Ben because it's the right thing to do. So let me see.

Speaker 3 - 01:31

I just want to make sure tis.

Speaker 1 - 01:34

Would I give them Ben's mom, huh?

Speaker 3 - 01:36

This one must be.

Speaker 1 - 01:37

It is. She's lovely woman. Let me see this away. I guess I can't see it, but there's ones like that. Like I did one with Tom and I did one with Jenny where I gave him a portion. But sometimes again, we don't talk about it. And you know, it is what it is. We don't have to give that referring agent anything. So like if you refer somebody to me and you're like, just take it. Not a big deal. I would take it. Same with Barb. She's referred a lot of during open enrollment. She doesn't want anything. She just gives them all to me. Perfect. So that's how that works. But if it's the office, we automatically know it's a 6040 split. The only other difference is we have this referring CPA named Jack. Jack refers a lot of groups that I manage in rippling.

Speaker 1 - 02:28

It's another portal that we manage Groups in. And So I get 15% of all those groups. Doesn't matter which one it is, how big or how small. I get 15. And then we have another group that the lady was. Was a CEO of another group that we. That we manage, but she left that company. She went to the new company and immediately called us and said, hey, I want you guys to manage this for us. And so that's. We AOR them. And I get 10% of that just because she brought me along and I manage it.

Speaker 2 - 02:58

Yeah.

Speaker 1 - 02:58

So I get a portion of that. So it's whatever. They're very different in the aspect, but everybody knows.

Speaker 2 - 03:05

So if this split. I mean, because really what you're concerned about here is which agents the split is between. Right.

Speaker 1 - 03:11

Between the house or between the house and other agents. Yes.

Speaker 2 - 03:15

So if this were your referral source, but you and Ben are splitting it, the numbers would be based on whatever.

Speaker 1 - 03:24

The historical or whatever we agree on.

Speaker 2 - 03:27

Yeah. Would that be. So you could say this is split between this agent, and maybe any other agent, and then put any notes about how it should be split?

Speaker 1 - 03:41

Yep. So that strat. So this is a good one. Strata van. So the notes here. So b. See, other problem is it doesn't all get done there.

Speaker 2 - 03:53

Yeah. Yeah.

Speaker 1 - 03:54

So that's one thing. So here. It should be here.

Speaker 2 - 04:01

Yes.

Speaker 1 - 04:03

Hold on, hold on. So give me one second. Let me find. Oh, Jack.

Speaker 3 - 04:09

Chloe.

Speaker 1 - 04:09

Not Chloe Haley, but give me Pampha.

Speaker 3 - 04:13

Lisa local,.

Speaker 1 - 04:24

Right here. 10% To nada. So that's how it would be. So that's where the split is. So the agency gets 90, I get 10. And so. But the house always gets something, whether it's the 30% because it's a split between what I bring in and what they are taking for managing, or if it's something that Christy sends to us. If Christy sends it to us, it's a 60, 40. House gets 40, we get 60. So if it's a personal referral. So like, we have current clients that come to us. So, like I get. So she details. She was referred to me by one of my current clients. So this is a 70, 30 split to me because it's a personal. And it'll be right here. Client.

Speaker 2 - 05:13

Yeah.

Speaker 1 - 05:13

Or if it says referral source, current client. And then sometimes we put 70, 30, sometimes 60, 40, because the client originally came to us. Even their current. They came to us five years ago by a referral from Christie. So a lot of it used to be 50, and then we got bumped up to 60, 40. So those need to start changing slowly. But sometimes we forget and it's still, we're probably still getting paid 50.

Speaker 4 - 05:37

50.

Speaker 2 - 05:37

Yeah, yeah.

Speaker 1 - 05:38

So but if we catch it in time, then we can do that change. So. But Jack Max play groups.

Speaker 3 - 05:47

Which one?

Speaker 2 - 05:48

So all of the turn in sheets get uploaded to the client record and they all should.

Speaker 1 - 05:54

Sometimes we have agents that don't turn in a turn in form, myself included, just because we get busy and then we have to go looking for them. For example, I haven't done an emeritas one for this client, but I know I have to. But I put all the information in her thing. What's her name?

Speaker 3 - 06:09

Hillary.

Speaker 1 - 06:10

Oops, now you're thinking nada. Dang. You remember all these? Yes, I'm in here all the time. So Hillary, she has a new policy right here. Emeritus. But I never did attorney form just yet. Yeah, but she would be originally when she came to us, she is a 6040 because she found us through Google or something like that. Yeah, so. So that's why current. So she would go, whoever does our commissions now whether if it's a small statement and Fulani does it, she would see historically it says 60 40, so it'd be 60 40.

Speaker 3 - 06:43

Okay.

Speaker 1 - 06:44

So that kind of thing. Whereas Tom does never puts a commission split on there. So I don't know how they would do, how they do their commission splits. So it would be something that they would have to talk about. Yeah, but we know historically if Christie gives the lead to anybody, it's a 6040 split. Unless she says take it, then it's a 60 40. So sometimes she'll give me a group and she's like just take it. So I do 60, you know, 7030 on that.

Speaker 3 - 07:13

So.

Speaker 2 - 07:14

And when you. So what's the process for getting the completed turn in sheet into here?

Speaker 1 - 07:21

We scan it in.

Speaker 2 - 07:22

Okay.

Speaker 1 - 07:23

So like if so right here I have a file. I do the sales report. So every month I go in, I put everything in one file so it doesn't clog up my inbox. And then I put the put a report together and I put all this information. But sometimes the information is not completely there. But so see she's a current client. So all they did was name, number, what plan that they were going to the app prior to Fulani doing this. I would take this and then go to the person's portal file and if they weren't here, then I'd add them into an individual policy with the current information and then, but since she is there, I just go here, go to Notes, add this in and then go to policies and create one. Which has already been done.

Speaker 2 - 08:11

Yeah.

Speaker 1 - 08:12

And send. Send out a privacy notice.

Speaker 2 - 08:17

Yeah.

Speaker 1 - 08:17

And then that's it. And that's how it gets there. So all our records, all our keeping goes into this system, but we have to have it. So if there's something like spelling is huge. So if we don't get it correctly, you know, that's. Sometimes we're like, oh my gosh, I can't find this person. Sometimes like, okay, well how did we spell it? What did we do? Or you know, give us an email. So there's always a way to find the person, but sometimes I have to do a reverse search for phone number and I have to look it up that way.

Speaker 2 - 08:44

Yeah. And so are you able to search by emails here?

Speaker 1 - 08:49

We can, we can do a search. So like if we go here, right here. And if I do email. So 4630, I can be like, okay, let's file.

Speaker 3 - 09:05

Hold on. Save. Oh yeah, come on. Why is this 4630 at contest wise? That not a good one. Com. Oh, yeah. Comcast review required fields.

Speaker 1 - 09:32

Oh, see Diffuser record. So you're like, oh, somebody already has that. Who is that? And then I have all those Ds.

Speaker 3 - 09:41

But where is it? Why is it not doing that? Tribe search, individuals and then where is it? So it should be right here where it lets me do their email. But this email is my email and I swear it's on here.

Speaker 2 - 10:39

Oh, it's right there. Email.

Speaker 1 - 10:41

Where? Oh, there it is. Really?

Speaker 3 - 10:59

I swear. Owen's 46 30. Hell, let me see who else.

Speaker 1 - 11:09

I need an email.

Speaker 2 - 11:17

Do you guys have groups in here too?

Speaker 1 - 11:21

See my mom. So like I searched by her email.

Speaker 2 - 11:23

Gotcha.

Speaker 1 - 11:24

And there she is. So we can. If you need groups. So here's groups right here. These are all our groups.

Speaker 2 - 11:30

Got it.

Speaker 1 - 11:31

If you want to search in advance, like just who the agent is serving as an agent, we can go here and search. And these are all the groups that I'm going to be in charge of.

Speaker 2 - 11:45

Got it.

Speaker 1 - 11:46

Which is not accurate though, because I.

Speaker 3 - 11:49

Have more than that.

Speaker 1 - 11:51

So. Or we can do advanced search.

Speaker 2 - 11:56

So what's the functionality that AMS is going to charge you for? For working groups?

Speaker 1 - 12:02

It quoting or they'll charge for quoting. Okay, so. And it's per quote. So they want to charge us for. So we can do email, we can do texting, but they charge us per text. They can say we can do. But then we have to have a line that is going to be. So we have to have, like, a phone number that is strictly dedicated to texting people. And unfortunately, we don't have one dedicated phone number. Like, we're not gonna bog Christy's cell phone down by doing that. We're not gonna do mine. We're not gonna do. And we're not gonna get a separate cricket line just to have that. Because people are gonna text that. Someone's gotta man that.

Speaker 2 - 12:50

Yeah, exactly.

Speaker 1 - 12:50

So it's like, why would we do that? And if it. And if it's like 75 cents per, 35 cents, and then they're like, oh, it's just a penny per. I'm like, okay. But if you think about that, we have 5,000 different entries in this, and if we each send them one, they send us one back. That adds up pennies or not. That's just ridiculous. And then we have to add a fee to be able to use that. So that doesn't make sense. And then for. They want us to do their drug list, and so doing the drug list, they're going to charge us per user, per time, per the person. I'm like, oh, my gosh, you're just nickel and diming us.

Speaker 2 - 13:27

Yeah.

Speaker 1 - 13:27

And then the group coding and all this. So we. That's why went to Wired Coat. If this works seamlessly, just like water quote or like UMA or whatever, all our other things. Yes, we would use it. There are agencies that solely use agency block as their CRM, everything.

Speaker 2 - 13:48

Yeah.

Speaker 1 - 13:49

But we're not capable of doing that because we have so many different areas that we work in. And I know we want to streamline that. I've been working on trying to stream this for years. Years. Our calendar to sync our HIPAA compliance, our privacy notices, all these things that we want. So we go to set more. Set more is our. Our calendar. So this is our calendar. This is everybody's calendar. This is what everybody has. And then we have settings and we have our team. Here's our team. And this is how many, you know, people have admission or are be able to go in

to change our working hours, to change whatever our booking preferences are, unfortunately.

Speaker 2 - 14:41

Is this booking from the website?

Speaker 1 - 14:43

No. Oh, no, this is a separate. Well, this gets linked to our website, and that's who we go through. But the problem with this calendar setting, I would love for it to pick instead of having to create separate little choices, like, I'm jumping everywhere.

Speaker 3 - 15:04

I know you have many questions about things, but this is what we want.

Speaker 1 - 15:07

So here's. Book an appointment yeah. We have individual family. Hey, what's up? Eight something. Hold on. That is for our line of Medicare in Arizona. We do. We write in Blue Cross, Blue Shield. Okay, so back to what I was saying. So. So when somebody goes to schedule a time with us, this is where they go. They go through our website or they have our link in here. We have a link. So your team. If I go to myself, I have a booking link right here. I just copy that. And that's in my signature line. So what I want it to do though is like if I have an appointment open, but they want to physically meet me.

Speaker 2 - 16:02

Yeah.

Speaker 1 - 16:02

In person, I want it to select. If they choose a in person appointment in person. And I'm taking. I want it to show Wednesdays I work from home. Monday I work from home. But I want them to allow to do. Only do Thursdays and Fridays. That's. Or Thursdays and Tuesdays pop up. Those are my only in person days.

Speaker 2 - 16:28

Yeah.

Speaker 1 - 16:29

Unless you come. They don't allow that. They don't allow that. You have to pick. You have to choose because like during open enrollment, like I don't want to be here every day for just one meeting. I want it all on Tuesday, all on Thursday with availability to move people in on a Monday, Wednesday if I need to. Like they absolutely need me.

Speaker 2 - 16:48

Yeah.

Speaker 1 - 16:48

Or I'm in person from 10 to 1 and then 2 to 5 at home or 7. You know, that's. And that's what we're trying to work with. And nobody can do that. So if you know how to do.

Speaker 3 - 17:02

That, that'd be awesome.

Speaker 1 - 17:04

So back to turning sheets. Turning sheets get uploaded back to this Wired quote back to here. And they go to the notes. They want to charge us for quoting. We do quoting on Wired quote.

Speaker 2 - 17:20

Yeah.

Speaker 1 - 17:20

Where it charges us money to do this.

Speaker 2 - 17:22

Yeah.

Speaker 1 - 17:23

So every time we. Per quote. Per whatever I pull.

Speaker 3 - 17:31

Damn, that's too expensive. So like this people.

Speaker 2 - 17:51

So right now you're looking at rates for a group. Right.

Speaker 1 - 17:54

So this is awb. They do.

Speaker 3 - 17:56

Damn, that's too expensive for these people. They're always so expensive.

Speaker 2 - 18:05

Yeah. It's crazy.

Speaker 3 - 18:06

\$3,000.

Speaker 1 - 18:12

They're the only ones that do a husband wife group only plan though, without having to have other people.

Speaker 2 - 18:17

Oh, wow.

Speaker 1 - 18:17

But they're a little old. The older side.

Speaker 2 - 18:19

Yeah. So they're. Yeah, yeah. Ding for the age.

Speaker 1 - 18:24

Exactly. Anyway, so we do all our groups codings here and then it. Ding. It charges us whenever we do that. So if there's a mess up. So if you send me a census and Then I kick it back to you before I do that. That's why. Because

all the information that it's needed I have to fill in. So if I don't have it and I run it and then you're like, oh, we forgot four people, I have to redo it and it charges me all over again.

Speaker 2 - 18:48

Yeah.

Speaker 1 - 18:49

So we try to avoid that as much as possible.

Speaker 2 - 18:52

Yeah,.

Speaker 1 - 18:54

Yeah.

Speaker 2 - 18:55

To what extent does Agency block communicate with Wired?

Speaker 1 - 18:58

Quote, it doesn't.

Speaker 2 - 19:00

Oh, okay.

Speaker 1 - 19:01

I think there are some integrations that it has. So if we go to here settings, these are the integrations you can do. Quote, you can commission third party integrations. These are things that you can do. You can actually have a. So these are things that it does do it with Sunfire. That's the one where it will do like the prescription drug thing. But our Sunfires are not all working. So it doesn't make sense to do something like that. Especially if they charge you over time.

Speaker 2 - 19:39

Yeah.

Speaker 1 - 19:39

So because like Christie's is fine, but like when we left and did. Oh, what's there called Jared's.

Speaker 3 - 19:46

His name.

Speaker 1 - 19:49

Doesn't matter. There are fmo, but they do it for Devoted, Humana and United Healthcare. That's who our FMO is for this. These three products. But when I log into my Sunfire, it says I'm not appointed with Humana, United Healthcare, but only with Devoted. And I'm like, that's a lie. So during open enrollment, they kept pushing and pushing us for you to Sunfire, but I said no, because you're not. To this day I still showing that I'm not appointed, but I have a human portal, so I'd rather just go after it. Do direct to the source.

Speaker 2 - 20:21

Yeah.

Speaker 1 - 20:21

So I have 21 certifications. I just use the portals. I don't go through a third party vendor. And I think that's what they would love for us to do. Then that way everything that we do, it kind of merges. They do have this email function that I would love to use because right now, as you saw, like our email boxes are full of conversations we've had back and forth with, you know, certain carriers or certain people at groups. I would love for all that information just to be put in here where I don't have to save it and upload it. But I tried it one time and it looks like it works. But then when I go into Agency block, if you are using my portal, you could see my entire inbox.

Speaker 2 - 21:02

Oh, wow.

Speaker 1 - 21:03

And I was like, that's not the integration I want. Yeah, I don't want people just they're like, well, only you can see it. I'm like, but we share. So like Christy shares with Fulani. Fulani doesn't need to see her inbox in Gmail. And same with Whitney and Jenny. Or Barb had her own and I have my own. But it's like no one should be seeing our emails. Not that there's anything bad, but it's just like, why does anybody need access to my emails? You know what I'm saying? So that is the one thing I don't like. So I had to stop that on this. But that's interesting that we could do that.

Speaker 2 - 21:39

Is there any way to do an import of data into agency block from. From spreadsheet or like, because I'm looking at, you know, automating the or digitizing the. The turn in sheet. Right? So if this, this were all captured as a data source, I.

Speaker 1 - 22:02

Was gonna have Ben do it too. It was kind of heavy and awkward. The printer, because he was going down and I knew, I was like, oh, hey Benny. But he left really quickly. He didn't even say bye.

Speaker 5 - 22:16

I think he had something going on because he wanted to start early this morning.

Speaker 2 - 22:19

Oh, so what's wrong with the printer?

Speaker 1 - 22:24

What?

Speaker 2 - 22:24

What's wrong with the printer? Just doesn't work anymore.

Speaker 5 - 22:27

Well, we, I don't know. So it kept saying this error that the magenta laser color wasn't working. And I replaced it and then I replaced it again.

Speaker 4 - 22:36

And it still.

Speaker 1 - 22:37

And we cleaned it. We pulled it all out and took, you know, and then there was like.

Speaker 5 - 22:41

These online hacks about how to like restart it. So we factory resetted it. It just wouldn't go away. So I got tired of dealing with it.

Speaker 2 - 22:50

Does it still do black and white?

Speaker 1 - 22:52

It won't print at all.

Speaker 2 - 22:53

Oh, it won't print at all.

Speaker 5 - 22:54

Print. It just won't scan.

Speaker 1 - 22:56

Oh no, you're right. It won't print. It'll print but won't scan. Yeah, it does it in black and white.

Speaker 5 - 23:03

So I just bought a black and white one because that one's colored. But I mean if you want it, you're welcome to have it.

Speaker 2 - 23:07

Yeah, I'll take it.

Speaker 5 - 23:08

I've got extra toner and stuff.

 Speaker 2 - 23:09

Cool.

 Speaker 5 - 23:10

You can fix it.

 Speaker 1 - 23:11

I know you'll send a picture. Be like, I just was done with it. You know what, that's good. Let me see. They have an automated workflow. Like I've no additional cost. Automate to never miss follow up agent reminders communication how long are you here today? Till I'm here whenever. Long I want to be here. Oh, shoot.

 Speaker 3 - 23:37

That's okay.

 Speaker 2 - 23:38

I mean, because she's leaving at 2:20.

 Speaker 1 - 23:40

Oh, no, I have my own keys. Okay, so text messages. Not what we have calendar. So we can integrate our calendars. I don't know, to be honest.

 Speaker 2 - 23:55

There's a way to import.

Speaker 3 - 23:56

Import our data.

Speaker 1 - 23:57

I don't know if they have to do it or we do it.

Speaker 2 - 24:00

I mean, the thing is, it looks like your turn in sheets are in agency block just as PDF. They are just stored records.

Speaker 1 - 24:06

That way we are. That is exactly how it is.

Speaker 2 - 24:08

If they're. I mean, if this were. Is there a way for this information to be stored in agency block as data? Cool.

Speaker 5 - 24:17

Yeah. It's just that we couldn't function without the scanning.

Speaker 2 - 24:19

Yeah. Yeah.

Speaker 1 - 24:21

And then let's find out.

Speaker 2 - 24:23

Okay.

Speaker 1 - 24:23

Hi N. You're chatting with an AI Assist. Oh, I love AI Assist. Oh, what? I said I love AI Assist in agency blog.

Speaker 5 - 24:33

She's resistant.

Speaker 1 - 24:35

I'm not resistance. I'm annoyed with it sometimes it's not useful. It's not useful. Especially when people call you and they're like, I. I googled AI this question about health insurance. I'm like, that is not correct, sir.

Speaker 2 - 24:46

Yeah.

Speaker 1 - 24:47

And they're like, no, I told me. I was like, listen, I've been in. And you know, I go, you know what? You're right. You know what? Let me call somebody right now and I'll put them on hold. And I'll be like, I was watching.

Speaker 5 - 25:00

This show called St. Denis. Has anybody ever watched me? It's a comedy show. It's like on Netflix and it's about this hospital in Portland. Or like they're competing. They're in Oregon. But anyways, last I was watching it and there was an episode and the guy comes in and he's like explaining what's wrong with him to the doctor. And he's like, well, I checked with Chat GPT and it says blah, blah. And he's like trying to turf this guy off to another doctor.

Speaker 3 - 25:28

And he's like.

Speaker 1 - 25:29

He said something.

Speaker 5 - 25:30

He goes, oh, not a Moore. That's. It was so funny. I was just cracking up. But it's so true.

Speaker 1 - 25:39

Like, it is. And so I was like, you know what?

Speaker 5 - 25:42

I don't need a doctor. I need my own MRI machine.

Speaker 1 - 25:45

Right? I was like, you know what, sir? Hold on. And then I was just letting him be on hold and I come back and I was like, you know what? Unfortunately, I think what you were reading. Yes. You do not need an SCP for Apple. However, your child can. But the system decides whether they can get coverage or not. But if they're not on Apple, like, even when you pay for those pretty premiums, he does have to have an scp. Not simply because you and your wife forgot to add him to your plan.

Speaker 2 - 26:14

Yeah.

Speaker 1 - 26:15

And he's like, oh, okay. He's like, let me call you back. I'm like, sure. He never called back. I'm like, whatever. Agency block. Okay, what do we want? Is there a way?

Speaker 2 - 26:31

Yeah.

Speaker 1 - 26:33

You know what? I bet you Jackie's husband knows how to do that.

Speaker 5 - 26:39

We have.

Speaker 1 - 26:39

I have a friend, Jackie. Her husband does a lot of this stuff. He created his own version of Agency Block.

Speaker 2 - 26:47

Oh, yeah.

Speaker 1 - 26:48

And it does everything I want it to do, but he would have to take our entire book and do it. And I was like. I'm like, no, thank you.

Speaker 5 - 26:59

What happens if he dies?

Speaker 1 - 27:01

Well, no. What happens? No, because we would still be in charge of it. He would just.

Speaker 5 - 27:04

I know, but we wouldn't know how to make any changes to it or manage it.

Speaker 1 - 27:08

And I was just like. And he's like, do you want me to help you do that? I was like, not at this time. Thank you. I'm like, heart, you guys. I love you. I'm sorry. I'm sad you guys moved, too.

Speaker 5 - 27:20

Shredding came already.

Speaker 1 - 27:21

Oh, damn it. I have a lot of shredding that I need to bring.

Speaker 5 - 27:25

Oh, well, it was already full, so bring it.

Speaker 1 - 27:29

Okay. Hammond, is there a way to upload?

Speaker 2 - 27:34

Yeah, from spreadsheet.

Speaker 5 - 27:38

Okay, so this one is the one to return. Thank you for putting it back in the box.

Speaker 1 - 27:47

I try to do it as. Like, they did it.

Speaker 3 - 27:50

Yeah.

Speaker 1 - 27:50

Minus the tape. That would be a. Hold on.

Speaker 3 - 27:56

I know the stream at this point, she would tell me to use AI. Is there a way to upload from a spreadsheet to agency block that would automatically add the information to the client. Oops. To the client folder.

Speaker 1 - 28:19

Or create a client folder, because a lot of them don't have them.

Speaker 2 - 28:23

Yeah.

Speaker 3 - 28:23

Client folder. Create a client folder. Yeah. Your rates are too high. Likewise.

Speaker 1 - 29:19

All right, so. Yeah. Well, we just have to wait for that. We. And then. But for now, we just do it. All this. This kind of intake. Could we do it from another way? That would be awesome. I just know that we can pull reports, pull policy, do records, activities, call logs, call recordings, and we can do audits. I don't know what else we can do here. Just a workflow. I mean, I Haven't really played with it just because they Nick. When I miss for everything that we want to do.

Speaker 2 - 29:53

Yeah.

Speaker 1 - 29:53

Like my dream for this would be for again the email thing. Like if I go to my mom. So like here so emails. I was like is there a way we can import emails? Like oh my gosh. How cool is that? I have to link my Google and like then if I. It's like they want you to use only agency blocks so all everything. But then that's still. That one step is still missing because then you still have to assign it to the person it goes to.

Speaker 2 - 30:26

Yeah.

Speaker 1 - 30:26

Not. And so I'm like that's stupid.

Speaker 2 - 30:29

Yeah.

Speaker 1 - 30:29

I want it automatically to send. So I don't know if you can do that. I'd love to automatically send my emails there. But the bad part is was when we go here this is our. This is ident. I don't know if Christy showed you this.

Speaker 2 - 30:59

This is our protect and trust or secure email.

Speaker 3 - 31:03

Gosh.

Speaker 1 - 31:03

This is our secure email. They don't show up in Gmail as sent. So we have to go here and see where they're at.

Speaker 2 - 31:20

Wow.

Speaker 1 - 31:21

So that's the only downside to having that program.

Speaker 2 - 31:24

Yeah.

Speaker 1 - 31:24

Is because here I can go to all my scents but I'd love to clean these out because this wastes a lot of space in my memory for my account.

Speaker 2 - 31:32

Yeah.

Speaker 1 - 31:33

But I can't because I have to have record improve. But again we print it off and save it here. But what if that crashes?

Speaker 2 - 31:38

Yeah.

Speaker 1 - 31:39

I'm just. I save everything.

Speaker 2 - 31:41

Yeah.

Speaker 1 - 31:41

So that's. I mean I get it. We want to streamline a lot of it so we don't have a lot of this issue. But again we're just not finding the right program to do that. So to streamline, automate and be able to pull this automatically, even drag and drop in there for it to pull would be awesome. But it doesn't do that. It saves it as PDF so anything I want to save goes here.

Speaker 3 - 32:18

So all our things are here.

Speaker 1 - 32:20

Every single thing. All our notes. So and then. But again it allows you emails incoming. Well what emails did we have? Where is that?

Speaker 2 - 32:32

Yeah but we can't.

Speaker 3 - 32:36

So yeah I.

Speaker 1 - 32:38

Know that they have a new cells a lead option to we can add a import leads.

Speaker 3 - 32:44

Oh I bet you it looks like you can. So huh.

Speaker 1 - 32:52

It looks like you can upload. I wonder if that could be what we could use for.

Speaker 3 - 33:00

For sales report because it looks like.

Speaker 1 - 33:05

It allows you to do that.

Speaker 2 - 33:20

Would you email that to me that template.

Speaker 3 - 33:28

Huh. Lead source Lead note. Interesting.

Speaker 1 - 33:33

That's cool. So I guess we can.

Speaker 2 - 33:35

Yeah, but that is. Is that a paid add on or is that.

Speaker 1 - 33:38

I don't. I don't know. I don't think so because it would have told me.

Speaker 2 - 33:44

Yeah. So you're just going through the steps. Upload the file, huh. Do the import.

Speaker 1 - 33:49

What's your email?

Speaker 2 - 33:50

Chrisg, at cgis you do good body. You might find me that way. But at cg. Yeah.

Speaker 3 - 34:12

There you go.

Speaker 2 - 34:17

So do those. Would those leads go in as new clients? Is that.

Speaker 1 - 34:21

No. I don't know. Let's find out. Review important instructions. How to import sales records. Undo.

Speaker 3 - 34:45

Okay. Import fields. Important instructions how to import new sales records.

Speaker 1 - 34:51

How to mass update existing sales records.

Speaker 3 - 34:53

Important frequently asked questions.

Speaker 1 - 34:55

So these are our fields that does.

Speaker 3 - 35:05

So import leads, birthday, et cetera. On the import sales record type page.

Speaker 1 - 35:11

If you're only adding new records, you.

Speaker 3 - 35:13

You could skip the matching criteria. Choose to upload on the map. Import file headers to lead fields. Import button to update existing sales records. We recommend running a downloading sales record.

Speaker 1 - 35:37

So kind of like my sales report, I can upload that, but I'm going to have to tailor it to. Hey, I think I might have been. We think we came up with a.

Speaker 3 - 35:47

Solution to your question.

Speaker 1 - 35:48

What was my question? His question is how to digitize this to import in a large file to agency block.

Speaker 3 - 35:54

Yeah,.

Speaker 1 - 35:57

We can do a. Through an import sales records. So it's like a import for like leads. Or you can do. To update current sales records like, you know, Nancy Menken, whatever.

Speaker 5 - 36:13

But how's the information get in there? We're trying to eliminate data entry, but.

Speaker 1 - 36:19

We have to have some sort of data entry.

Speaker 5 - 36:21

Well, if he was saying, what if we created like a thing where you guys fill it out digitally and it pops onto an Excel spreadsheet and then.

Speaker 2 - 36:34

What we're saying is then you could import the spreadsheet this way.

Speaker 1 - 36:37

Yeah.

Speaker 5 - 36:38

So that would eliminate that entry.

Speaker 1 - 36:39

Yeah, that. No, that's what I'm saying right here. If this is. If this is what I'm correctly reading, which we're both reading, this is what it does say. Look, look. And I don't think we pay for this. I think this is something that's already. It's just how to import sales records. So importing data. So right here in agency block, import leads. So I just clicked on it.

Speaker 5 - 37:01

How would it know though, if it was. If it's already an existing client, it.

Speaker 1 - 37:05

You have to choose right here, you choose it. Whether it's. So you import the lead and you tell it, you know, you kind of figure out. But then right here it says sales records and then it says where did it.

Speaker 2 - 37:17

Where did we see there was some note about. Yeah.

Speaker 1 - 37:20

If it's when we find an existing record that matches an importing record. What do you want us to do field we recommend using update if only one matching record is found in option.

Speaker 5 - 37:28

Yeah.

Speaker 1 - 37:29

So we have to make sure that when we do this that people that have like matching emails or matching phone numbers. Because you know how a lot of our Medicare clients use the same phone number. We just have to change.

Speaker 5 - 37:40

Well, plus a lot of people have been put incorrectly as like duplicates.

Speaker 1 - 37:44

Yeah.

Speaker 5 - 37:44

And it's the same person.

Speaker 1 - 37:46

So we'd have to definitely go through. It'll make us go through. And I think right now is a good time to do. Especially during the summer before we get busy. Would be a good time to go through these records. Because I know that when we did that first data import to move to agency block, we didn't have enough time to review all that record coming in from that old. I don't think we reviewed anything. We reviewed a few, but we. Rando picked them because like when I can see is the oldest client, Barbara Hill.

Speaker 3 - 38:16

So Hill right here.

Speaker 1 - 38:19

Barbara right here where it says when we imported some of her stuff, it says Gary data import.

Speaker 5 - 38:27

This is when we started when we moved over.

Speaker 1 - 38:28

So all this stuff 2013. Yeah, all the stuff when. No, it was 2017 when I moved here or when I started working here. That's when we did this change. So Gary from agency block imported all the data over and so everything old from the old carrier. And then we started new here.

Speaker 3 - 38:46

Here.

Speaker 1 - 38:47

So we checked Rando leads, but not all of them. So there's a lot of duplicates from Gary. He imported. Because he just imported everything.

Speaker 5 - 38:55

Oh, okay. I just know I see it all the time on new stuff because it didn't get looked up first.

Speaker 1 - 39:00

Okay. I.

Speaker 5 - 39:02

This is pica. This is the census I use for the re rate. But I don't think all these people are actually enrolled yet like they were gonna. So I need to know who's not technically enrolled yet through either on the health. Oh, yeah. On rippling. If you could tell me. I'm gonna run to the bathroom.

Speaker 1 - 39:17

Okay.

Speaker 5 - 39:18

Because I need to get enrollment forms.

Speaker 1 - 39:20

Okay.

Speaker 5 - 39:28

And I think Anna's name is spelled wrong.

Speaker 3 - 39:32

It should have just been a nice. Sent that over so she might know how to spell her name.

Speaker 1 - 39:42

FYI. Let me see.

Speaker 3 - 40:00

This is how we run these ones.

Speaker 1 - 40:14

Okay. Oh, Anna is 1A.

Speaker 3 - 40:19

I did not do that. So I don't know where that's coming from. Unless you got that from Wide quote. Did I spell her name wrong? Okay. Oh, I just found him out with my bad. Okay. I fixed it.

Speaker 5 - 40:42

All right.

Speaker 3 - 40:44

Elizabeth Kyle. That's 11. So she was on the list. The first list.

Speaker 2 - 41:09

What else does rippling do?

 Speaker 1 - 41:12

Rippling does.

 Speaker 2 - 41:14

Does it send the enrollment forms to the employees?

 Speaker 5 - 41:17

Check everybody's date of birth before I ask for a re on it.

 Speaker 1 - 41:22

Yes. This is the census I went through. Yes. I spelled Anna's name wrong. I added another A when I went through Wired quote. So that's fine. I just updated it here.

 Speaker 5 - 41:34

You don't need to rerun the quote. I don't want to.

 Speaker 1 - 41:35

No, I'm just. I'm just checking. Do you want to.

 Speaker 5 - 41:41

Where's that from?

 Speaker 1 - 41:42

This is the census that you gave them that you. They had chat that.

Speaker 5 - 41:47

Who gave it to me.

Speaker 1 - 41:48

You sent it to Anna.

Speaker 5 - 41:49

So Anna gave it to me. Okay.

Speaker 1 - 41:51

I. I don't know.

Speaker 5 - 41:53

So Elizabeth is 1028 70.

Speaker 3 - 41:55

Hold on.

Speaker 1 - 41:56

1028 70. Yep. I'm going through the main sheet.

Speaker 5 - 42:02

Okay. And then Kyle. 3, 1083.

Speaker 1 - 42:05

3 1083.

Speaker 3 - 42:06

Yep. Jacob 211.99.

Speaker 1 - 42:08

Yep.

Speaker 5 - 42:09

Anna 1284.

Speaker 1 - 42:12

Yep.

Speaker 5 - 42:13

Okay. Aaron is 715.72. Molly is 3891. Kristen is it 10 2872.

Speaker 3 - 42:24

10 2872.

Speaker 1 - 42:26

Yes.

Speaker 5 - 42:27

Okay. Samantha is 7 1286.

Speaker 3 - 42:30

7 1286.

Speaker 5 - 42:32

And Elizabeth is 4494.

Speaker 3 - 42:34

Or 494.

Speaker 1 - 42:36

Reuben. 4 1264.

Speaker 3 - 42:38

41260 64.

Speaker 5 - 42:39

And Leslie. 11, 1085.

Speaker 1 - 42:42

11 1085.

Speaker 3 - 42:43

And that was 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 11.

Speaker 5 - 42:49

Yeah, but can you see who's actually enrolled in Rippling?

Speaker 1 - 42:53

Yes. So Anna needs to be enrolled because she has no coverage as of today. That's. We need Anna and Kyle.

Speaker 3 - 43:02

Kyle.

Speaker 1 - 43:04

And that's it.

Speaker 5 - 43:05

Those are only two that are missing.

Speaker 1 - 43:06

Yes, but. Yep, because she has them highlighted. They're new employees and they haven't met their time, so.

Speaker 5 - 43:14

But they'll meet their time by enrollment.

Speaker 1 - 43:16

Yes. Let me look at her thing. She. They have a 90 day waiting period and she just came aboard March 23rd. So when's the Renault? August 1st.

Speaker 5 - 43:30

Oh, so we're plenty. We're fine. So should I get paper enrollment forms for these people or have them do it through Ripling?

Speaker 1 - 43:38

They can't do it through Ripling because it's not open yet for them to enroll.

Speaker 5 - 43:42

They'd Be eligible? Not for annual election. They'd be as a new hire.

Speaker 3 - 43:47

Let me double check. Why didn't they do it? Update enrollment. Let me look at her really quick. Insurance. Insurance. No results. Try something else. Salaried full time. So she is eligible.

Speaker 1 - 44:12

They have a 90 day wait period, right?

Speaker 3 - 44:15

So that should have.

Speaker 1 - 44:18

Done it.

Speaker 3 - 44:19

Do they have 90 day? Usually non profits don't. It was an empty or 60 day. Let me tell you right now. Benefits plans.

Speaker 1 - 44:31

Oh, they have a 30 day. Yeah, she missed her window. That's why. That's why it's closed. She didn't enroll right away.

Speaker 5 - 44:37

Oh, maybe she didn't need it.

Speaker 1 - 44:38

Okay, so she didn't even wave. She didn't do anything. So. So that's on her. So let me go to back to Kyle.

Speaker 3 - 44:44

See why he didn't enroll.

Speaker 1 - 44:49

He was hired April 27. He's part time hourly. What are their minimum hours? He too has not in enrolled.

Speaker 5 - 45:01

Okay, I'll ask her why the if they.

Speaker 1 - 45:03

If they plan to enroll and I'll.

Speaker 5 - 45:05

Just send her a form.

Speaker 1 - 45:06

Okay? Okay, Ben. If so. Yep, not a problem. Hold on.

Speaker 3 - 45:13

Insurance and math. Waiting period is 30 days and plans. Insurance plans. Okay, so Ripley.

Speaker 1 - 45:26

Ripley manages all their benefits. I manage them within here.

Speaker 3 - 45:30

So what it does.

Speaker 1 - 45:31

That's my little form. Another board tells me if we've renewed, we'd have it. I haven't finished it. Only because I ran out of magnetic strips. But this is all of our groups here.

Speaker 3 - 45:41

This is my personal group right here. They like this program as well.

Speaker 1 - 45:45

We offer it to everybody, especially if they. But it takes over. One person on their end has to manage it and then I manage the rest. So anything that needs to be done. So for example, we are renewing. Pika and Dayella, Chloe, Haley. So right now, if they were to renew as is, which we know they're not. The moment I get the information of what needs to be done, we go here, we go to pending. And then I start the renewal process. I go. I click on continue. I update the plans. I update what kind of plans, what the. If we're changing our contribution scheme, what it means, who gets what, how it works, it manages all that life insurance. There's some things that they don't manage. They do not manage State continuation. So that we have to manage outside.

Speaker 1 - 46:32

So we have to do paper app for that enrollment for cobra. If they manage, they have to pay for it through Ripley. So we pay for none of this. But rippling gives them a discount because we're their broker. Or Jack. If since he's doing the CPA version of it. They get a discount.

Speaker 2 - 46:51

So the group pays for ripling. Oh okay.

Speaker 1 - 46:54

Group pays entirely. But it's their HR platform and we, when they onboard and get a new hire, they just put their name and their email in. It emails the employee to.

**Speaker 2 - 47:07**

To enroll in benefits.

**Speaker 1 - 47:07**

To enroll in benefit. No, to update, to accept and to put in their information. And then it gives them the whole process on to enroll into benefits, put their dependence into all the things. And then it does an automated sheet. So right now I'm working with Auto Harmony as well. Their closing date is coming up for their renewal. So their closing date should be coming up. Let's see, open enrollment for them. Their date is May 20th. So I've got 1, 2, 3, 4, 5, 7, 8, 9, 10 people that haven't made a choice. So I'm going to reach out to my gal right now, which I should.

**Speaker 3 - 47:50**

Have reached out sooner to her. Brianna, open enrollment status update. Oops.

**Speaker 1 - 48:03**

So and then because once that's closed, I download all the materials and I send them off to Providence like any changes of enrollment form the census so they can see what needs to be changed, who was added, who was, what plan they went to and then that's it. And then the system knows who all should have coverage. So if they didn't select their enrollment, it automatically puts them as waiving. Doesn't matter. So then we have to go back and say no, they're not waiving, they're actually enrolling for a 61 inch start date. It's already done at the carrier level. And then I just random, I just override it. So I do a lot of overrides but there's certain benefits that they don't. They don't. Rippling itself does not. So what do you do?

**Speaker 3 - 49:14**

System. It.

**Speaker 1 - 49:58**

Okay, what do you do?

Speaker 2 - 50:00

So I've built a couple of consumer facing applications and I'm in the process of getting them on the app stores.

Speaker 1 - 50:09

Okay.

Speaker 2 - 50:10

But one of them is called Money and Macro. So if you go to [moneyand macros.com](https://moneyandmacros.com) basically what it is, it's an app that allows you to track your spending and create and see where you're at on your budget at any given moment. And then it also allows you to track, yeah, and it allows you to track your macros for your nutrients and stuff. So carbs, calories, fat, all that kind of stuff. And so what the way it works is, you know, there's a couple of videos there when you want to enter like let's say you go out to eat, right. And, and one of the biggest problems with being able to track your spending and your macros for your, you know, your nutrition information is getting the information into the app, right? Because when you're out to eat, you,.

Speaker 4 - 50:59

You have a, a receipt that you're.

Speaker 2 - 51:01

Given by the restaurant that says you had this drink, this food, and, and then your bill, right. Well, you take a picture of that with your phone from the app and then it reads the financial information and then it calculates your tip for you. So if you watch that video, the top one, that one right there. So basically what I'm doing is I open the app. So click on money and macros and it'll. Yeah, just hit play.

Speaker 4 - 51:29

All right, so I'm just done eating a nice meal at the Frontier restaurant.

Speaker 2 - 51:34

Have you ever been there?

Speaker 4 - 51:35

And I want to go into my money and macros and record the fact here at the restaurant. So I'm gonna just come in here and so this is from my phone sign. I can either scan a receipt, which if it's a receipt that's pre tip fill in, it'll actually show me what I can put in for the tip amount so I don't have to guess at my math. I can take a picture of my food, which I did earlier, and grab the macros and calories and fat and carbs and everything from that and or I could just scan the barcode for the item that I eat that's pre packaged or I can just manually enter something for my history. But I'm gonna go ahead and scan my receipt here.

Speaker 4 - 52:17

So I'm gonna open up my camera, take a picture of my receipts, say okay, I'm gonna let processing happen behind the scenes while it's reading the receipt and interpreting the amount and so it is automatically putting in the tip for me. So, so this was the receipt before the tip was added. So it's calculating the tip for me. I can change the total or I can change the tip amount. I have my preferences set to just.

Speaker 2 - 52:49

Round up to the nearest whole number.

Speaker 4 - 52:51

Because I don't like to have all the sense.

Speaker 5 - 52:53

Yeah, yeah.

Speaker 4 - 52:54

So I'm going to charge it to my credit card. Go ahead and log that. But I want to change the tip amount. Just a matter of changing it just changes the total for me rounding to the nearest whole number. So go ahead and log that. Now I've gone ahead and added that to my financial transactions list and I can see my picture, all my accounts and my amounts and everything in there. So that's. That's money and macro.

Speaker 2 - 53:22

Yeah. And then the other thing it does, too, is I've just added the feature to where when you take a picture of your restaurant receipt, then the next step it'll say is, do you want to log your macros from that meal? So it'll take the meal that you know, are paying for, and it'll take the names of it, and it'll say, okay, it looks like you had this meal or these food items. That's what these are, you know, coming up with for carbs and fat and calories and everything. And then once you have some data entered in there, then you can go in here and you can look at a graph showing you, like, that's what my. And if I say show all. So those are all my macros, and that's a graph of my macros. So I can see.

Speaker 2 - 54:09

And then I can add my weight or I can say, okay, what is my weight done with in the, you know, context of my macros, too? So, like, I could. If I. If. I mean, if I want to see a correlation between what I'm eating and what's happening with my weight, this allows me to do that.

Speaker 1 - 54:27

Oh, that's cool.

Speaker 2 - 54:28

Yeah. But it's. But it's budgeting. It's, you know, it's. It's basically a budget app for your money and your calories. But it's free.

Speaker 5 - 54:42

Yeah.

Speaker 2 - 54:42

To sign up for it. Works great on your phone.

Speaker 1 - 54:47

No, that's really good.

Speaker 3 - 54:50

Gotcha. Email sent.

Speaker 1 - 54:52

Perfect. That looks cool. I want to build an app, and even though I don't like apps, I do not have any apps on my phone.

Speaker 2 - 55:03

Yeah.

Speaker 3 - 55:03

I'm very against apps.

Speaker 1 - 55:05

I do not. My husband orders everything for me, and I make my friend enroll me in my.

Speaker 3 - 55:11

My workout classes because I would look at my app.

Speaker 1 - 55:15

I am very on my way.

Speaker 2 - 55:17

What app would you create if you could create one?

Speaker 1 - 55:21

You can't steal my idea. No, but I might need help building it. I want to create because I am a costumer. I make the costumes. I volunteer for costume making at the high schools. We just did Mary Poppins, but I always have to merge the kids. But what I want to do is I want to measure, and then I want to put it in the app, and I want the app to calculate how much fabric I need and to count, and I want it to. I want to be like, okay, I'm going to make this. And then I want it to tell me, okay, this is the type of how you would make that or you bring in here, you know, like, adjust it. Because I don't do patterns.

Speaker 1 - 55:56

Like, I just made a jacket because I'm like, okay, well, I know I need to side. I know I need to dip this. Like, I can visually see how create one together and where to put the darts in. So I did it. I did it within 10, four hours. So I can do that. I can visualize it, but I want to do that. I want to be able to put in the height of the kid, the weight of the kid, all their measurements in the area of their body that we measure, and it automatically spit out.

Speaker 2 - 56:23

The amount of fabric you need and what.

 Speaker 1 - 56:24

The fabric I need.

 Speaker 2 - 56:25

Yeah.

 Speaker 1 - 56:25

And what I'm making when I'm building, that's what I want to do.

 Speaker 3 - 56:28

That would be huge.

 Speaker 1 - 56:29

Do you know how huge that would be?

 Speaker 2 - 56:31

No, but if. But if. But if you're thinking about it, there's probably other people that are thinking the exact same thing. Yeah.

 Speaker 1 - 56:37

And it'd be huge. I mean, singer would probably buy it, because they could even. I'm just saying.

Speaker 2 - 56:42

Well, here. I got a proposal for you.

Speaker 1 - 56:44

Okay.

Speaker 2 - 56:44

Why don't we build it together?

Speaker 1 - 56:46

Okay.

Speaker 2 - 56:46

And then when we sell it, we can split what we make off of it.

Speaker 1 - 56:51

Yeah.

Speaker 4 - 56:52

All right.

Speaker 1 - 56:52

I'm serious. But I want to breathe able to build that. I want to build that because I think it would be great, and I think it'd be. And I know that if you look on the app stores, there's something similar, but it's not the exact same thing. I want to be able to do that.

Speaker 3 - 57:07

That's what I want to do.

Speaker 1 - 57:09

That's what I built. That's what I want to build.

Speaker 2 - 57:11

So do you want to start on it? Yeah.

Speaker 1 - 57:17

Yeah. I need it in my podcast. I want to put it on my podcast. I haven't started my podcast yet, but I want to do my podcast.

Speaker 2 - 57:23

Do you have a. Do you have a recording of what you need or what you'd want?

Speaker 3 - 57:29

Not yet.

Speaker 2 - 57:30

Okay.

Speaker 3 - 57:31

Yeah.

Speaker 2 - 57:32

Well, I'm recording this conversation, so let's just go ahead and explore this idea.

Speaker 1 - 57:37

Seriously, I want it. That's the idea I want. Yeah. But if you can help me build that, I would do that. I'll split it 50. 50.

Speaker 4 - 57:45

Okay.

Speaker 2 - 57:45

So you need measurements of the kids. So basically, your first task would be deciding.

Speaker 1 - 57:51

So, like, I have this. Like, this is the image.

Speaker 3 - 57:53

Like, I'll show you.

Speaker 1 - 57:57

Derek.

Speaker 3 - 58:00

Derek. There is no Derek to proc. It's right there. I fixed it.

Speaker 1 - 58:26

Okay, let's see.

Speaker 2 - 58:30

So the first thing you'd have is a project, right?

Speaker 1 - 58:32

Yeah. So, like, for example, we just did Mary Poppins, so this gal helped me make.

Speaker 3 - 58:38

She did the vest.

Speaker 1 - 58:40

So we have four form. It's an intake form that we use.

Speaker 3 - 58:44

For all the kids.

Speaker 2 - 58:49

Is it on paper?

Speaker 3 - 58:50

Yes, unfortunately.

Speaker 1 - 58:52

So, for example, this is Evans. So Evans, we get chest, waist, hip. All this. All this data gets, you know, so, like, all this data, this is just very generic.

Speaker 2 - 59:03

Yeah.

Speaker 1 - 59:04

How tall the kid is. Whatever. So when we do that, can you send me that? Yeah. So when we do that, we have to.

Speaker 2 - 59:13

You want to just text it to me?

Speaker 3 - 59:14

Yeah. I don't have your phone number.

Speaker 2 - 59:16

Whenever you're ready. Yeah, 5037-4740-3827-3827.

Speaker 1 - 59:28

Yeah, so, like, all that as a good example. And, like, you know, Ryan. We did Ryan's.

Speaker 3 - 59:35

We did Mary Poppins.

Speaker 1 - 59:37

And so, like, did we do Kenzie? No. So, like, even for when we did this one, you know, she had. I had to measure all the kits for these stuff.

Speaker 2 - 59:46

So you want to attach pictures of ideas and stuff, too?

Speaker 3 - 59:49

Yeah.

Speaker 1 - 59:49

Like, this is what we want. This is what our goal is. This is what, you know, we want. So, like, this is what I just did. So, you know, so see how messy that is? I had fixed that.

Speaker 3 - 01:00:02

I had go.

Speaker 1 - 01:00:03

That. I fixed that. So, like, I created this one that was super easy for me to make, you know,.

Speaker 3 - 01:00:11

So.

Speaker 1 - 01:00:13

So in Mary Poppins jacket, because nobody tells you when you're making house. Nobody tells you they don't give their secrets out online. Because I could search everywhere. When I did Cinderella's dress, I had to create two of them.

Speaker 3 - 01:00:24

I didn't know what I was doing,.

Speaker 1 - 01:00:25

But I created them because we had to switch her out of her regular pumpkin dress, put her into the magical dress, but we had to hide it in. So when she did her tearaway costume, it had to be in there. I had to figure that out on my own.

Speaker 2 - 01:00:38

Wow.

Speaker 1 - 01:00:38

So I did that.

Speaker 3 - 01:00:39

It was beautiful.

Speaker 1 - 01:00:40

People didn't realize that's where her dress was. So, like, they don't tell you how to do these things, so you had to figure them out. So that's me figuring it out. So my podcast name is Snitches get Stitches. So we haven't started. Anyways. Yeah.

Speaker 2 - 01:00:57

So basically you. You start with from. If we're walking through the process of a play, right. You get.

Speaker 1 - 01:01:03

So we get the play. So, for example, Mitch will say, hey, we're gonna do Mary Poppins. Like, okay, great. Who do we have? And then he does auditions, does all that and then he's like, okay, we have 200 costumes. Okay. I'm like, okay, well, what do I need to do? So we talk them through what? Design each person. We say, okay. So, like, that the fun off costumes that you just saw, that was for the Talking Shop because it's different than the movie. I don't know if you've seen Mary Poppins.

Speaker 2 - 01:01:30

Yeah, yeah.

Speaker 1 - 01:01:31

The Broadway version is different, where they sing Super Cali. It's different than in the movie. So they go through a couture. So we called it the Conversation Couture. So we made it like a fashion empire. So we created. So went through the process, and we created him. We're like, okay, we want him to look like this, and we want that. We want letters everywhere. We want words everywhere. We want all these things. And so that's when we're like, this.

Speaker 3 - 01:01:52

Is what we want it to look like.

Speaker 1 - 01:01:53

And so then I go. And I'm like, okay, well, if this is what we want it to look like, this is what I need to make. And so then, you know, if. I know if I'm making something from scratch, I have to measure the kids. This next show that we're gonna do next year, I already know what we have to do, how we have to do it. So it's like. It's just whoever we. We put into the roles. Smaller cast, smaller roles, but it's gonna better. But this one, we had so many changes. We do have things that we have on hand that we kind of just zhuzh up and do that. But the stuff from scratch is where I'm like, okay, this would help so many people who are into sewing and creating in doing all this would be.

Speaker 1 - 01:02:33

I feel like this would be a good one, because it's like, even if you're, like, a novice or amateur, I'm an amateur sewer, believe it or not. I can create things, and I just do. But that's. Who would. This would be focused, the amateur. Give them confidence to know that if you put in this tells you exactly what kind of fabric, what fabric you would use, how to do it, how to fold it, how to cut on the line, how to do all these things, and how to put it together to create your masterpiece. So because we don't want to take pictures of the kids, because that's inappropriate, even if we're like,

AI is like, oh, yeah, I can take it. No, because we can't take pictures of children.

Speaker 2 - 01:03:10

Yeah.

Speaker 1 - 01:03:10

So we have to just do the measurements and then put those up. So.

Speaker 2 - 01:03:15

So Basically, the app would allow you to say, this is the play. These are the costumes that we need. This is the number of performers. And then for each performer, you would have their measurements that you could enter in the app. So just open the measurements.

Speaker 1 - 01:03:30

So, like, if we did Newsies, well, we know that they need vests. We know they need knickers, you know, so we just take regular pants. Well, what if we didn't have it? Or pippin. We did pippin. I had to do a lot of, like, inspired. Like, we did a Mamma Mia. Inspiration overalls. I've never made overalls a day in my life, but I had to figure it out how to draw. Draw a pant and then keep it one piece.

Speaker 2 - 01:03:51

Yeah.

Speaker 1 - 01:03:52

I don't know what I'm doing.

Speaker 2 - 01:03:53

Yeah.

Speaker 1 - 01:03:53

You know, skirts are easy. You know how to make. I know how to make those, like, without nothing. No patterns or anything. I don't use patterns, but I was like, I didn't know how to make a Bridgerton inspired dress. I'm like, I know I was looking at a line, but how do I make the top? So. But how much fabric do you need? Everybody's always guesstimating five or too low or too high. But this gives you a little bit more. But, like, kind of when you put in the estimate for your floors and they give you that excess bit, so you have, like, in one, two extra boxes for mistakes. That's what I want it to do. Like, this is what it is. And then maybe even links to the websites of, like. Because we get a lot of.

Speaker 1 - 01:04:26

You know, we don't have joann's fabrics anymore, but we have fabric coat sellers in New York that has amazing deals on fabrics.

Speaker 2 - 01:04:31

Yeah.

Speaker 1 - 01:04:32

So we could. You can get your.

Speaker 2 - 01:04:34

Order your fabric there.

Speaker 1 - 01:04:35

Yeah. Get your fabric here.

Speaker 3 - 01:04:39

You know, that's what I was thinking.

Speaker 2 - 01:04:41

Yeah. And then the output would be, how much fabric do you need? The colors, the types.

Speaker 3 - 01:04:47

Yeah.

Speaker 2 - 01:04:50

That's cool. Yeah.

Speaker 3 - 01:04:51

That's what I want to do.

Speaker 1 - 01:04:52

Don't steal my idea, though.

Speaker 2 - 01:04:54

Well, we should. We'll do it.

Speaker 1 - 01:04:57

Yeah. But I think it'd be great. That's. That's just like. I feel like that's such a niche thing.

Speaker 2 - 01:05:04

Yeah.

Speaker 1 - 01:05:06

And that's what people like.

Speaker 2 - 01:05:07

Yeah.

Speaker 1 - 01:05:08

You know, because it's something that people could just use. And you could even translate it to quilts, but not just for clothing. You could translate to quilts. You can translate it to yarn. You can translate it to, you know, any DIY kind of creation. Clay. How much clay? How much you going to do pottery. How much you going to do that? Yeah, you know, mugs, ceramics, cricut work, you know, that kind of thing.

Speaker 2 - 01:05:32

Yeah.

Speaker 1 - 01:05:32

I don't know if you know what a cricut is. It's the machine cuts.

Speaker 2 - 01:05:36

Yeah.

Speaker 1 - 01:05:36

The cutting that cuts.

Speaker 2 - 01:05:38

Yeah.

Speaker 1 - 01:05:38

Vinyl. So people don't know how much vinyl they need.

Speaker 3 - 01:05:41

Yeah, I think it just.

Speaker 2 - 01:05:44

Could tell you all that stuff. Yeah, Yeah.

Speaker 1 - 01:05:47

I think that's what. Just don't steal it. Don't borrow it either. I'm like, don't borrow it. But I just. I think that's a good

idea, so.

Speaker 2 - 01:05:58

Yeah, no, it is. It's a great idea.

Speaker 3 - 01:06:00

Yeah.

Speaker 2 - 01:06:02

And that's the thing is, nowadays, you know, that can be done. I mean, if you just. If you just use the app, you create the project. You create the, you know, the number of performers, the costumes that you need, and then gather the measurements and then you'd have. For each.

Speaker 1 - 01:06:18

And then even budget. Like, if. Let's say we want to budget, you know, \$30 per kid, you know, is that reasonable or, you know, what. What does my fabric choices look like at that point? Like, it'd be great for high schools, too. Like, you know, a membership to know that.

Speaker 2 - 01:06:33

Doing plays and everything.

Speaker 1 - 01:06:34

Yeah.

Speaker 2 - 01:06:39

Yeah, that's good. I like it.

Speaker 1 - 01:06:41

Yeah.

Speaker 2 - 01:06:42

My kids were all in drama, did a bunch of plays, so.

Speaker 1 - 01:06:46

Yeah, I'm telling you, it'd be great.

Speaker 2 - 01:06:48

So you headed out?

Speaker 1 - 01:06:49

Yeah, yeah.

Speaker 2 - 01:06:51

I'm going to grab that printer, but I'm going to have to come back with my car, so. Yeah, let them park a little ways away.

Speaker 1 - 01:06:58

Yeah.
